Investigation Required

Insufficient Evidence

Solid pill. What the school should do about it.

Board urgency

◆ Very high · 4/4 years

◆ Medium

Outlined chip with a flame. How often the competency recurs in recent Board papers — independent of whether anyone is currently worried.

Confidence

● ● ● High

● ● ● Medium

● ● ● Emerging

Three-dot meter. Strength of the evidence that the pattern exists at all.

One entry screen, two tabs, because staff and students authenticate in completely different ways. The mascot is small and beside the wordmark — a welcome note, not the focus of the screen.

A brighter tomorrow for every student.

AVAI reads your assessments against the Board blueprint and tells you where marks are being lost, how urgent it is, and how sure we are.

BOARD-EXAMINATION YEAR

Class X

240 students · X-A, X-B, X-C, X-D, X-E · 5 subjects

Medium

Open BoardX · Unit Test 2

ASSESSMENTS

What has this class sat, and what has been analysed?

Only an analysed assessment can be opened in BoardX.

ASSESSMENT	CONDUCTED	MARKS	ANALYSIS	STUDENTS ANALYSED	DIAGNOSTIC STRENGTH	
Unit Test 2	12 Aug 2026	✓ Entered	✓ Analysed	240	Moderate	Open BoardX →
Unit Test 1	24 Jun 2026	✓ Entered	⌚ Pending	—	—	Open BoardX
Quarterly Exam	Scheduled Oct 2026	Not entered	⌚ Pending	—	—	Open BoardX

CLASS ATTAINMENT

How is the whole class performing?

Based on Unit Test 2 — the one analysed assessment for this standard.

Full mastery of tested Board marks		18 (8%)
80%+ attainment		62 (26%)
60-80% attainment		96 (40%)
Below 60%		64 (27%)

SECTIONS

Are all the sections in the same place?

SECTION	STUDENTS	OVERALL ATTAINMENT	HIGH-PRIORITY FINDINGS	ATTENTION
X-A	48	81%	1	Low
X-B	48	74%	3	Medium
X-C	48	78%	2	Medium
X-D	48	68%	5	High
X-E	48	76%	3	Medium

A section gap describes tested performance on this assessment only. It is not a measure of teaching quality.

SUBJECTS

Which subjects convert into Board marks?

SUBJECT	MARKS TESTED	AVG ATTAINMENT	AT EXPECTED LEVEL
Mathematics	17	12.4 / 17	36%
Physics	10	7.1 / 10	42%
Chemistry	10	8.2 / 10	58%
English	15	12.6 / 15	71%
Social Science	20	16.8 / 20	68%

TOP FINDINGS

What is costing this class the most?

The three findings carrying the most marks exposure. The full ranked set lives in BoardX.

All findings →

FINDING	STUDENTS	MARKS EXPOSURE	BOARD URGENCY	CONFIDENCE
Mathematics · Quadratic Equations Application Problems	146	613	⌚ Very high · 4/4 yrs	●●● High
Physics · Electricity Numericals	122	464	⌚ High · 3/4 yrs	●●● High
Physics · Light Whole chapter	84	227	⌚ High · 3/4 yrs	●●● High

Class X

Class level

The whole class in one view: attainment across all 240 students, every section, every subject, and the three findings carrying the most marks exposure. The assessment table at the top is the way down — only the analysed one opens, and the others say why they cannot.

Unit Test 1	21 Jun 2026	Not entered	Pending	—	—	Open BoardX

Class XII — nothing analysed yet

Class level

What a Board year looks like before its first analysis. The page still does its job: papers, marks state and assessments are all there, and the BoardX action is disabled with its reason rather than hidden.

Principal — BoardX

The assessment level, reached from a class page and carrying breadcrumbs back up. A calm, evidence-led command centre: no mascot anywhere on this surface, and every red or high-attention signal answers "why?" when clicked.

Assessment context and filters \$5.2

Breadcrumbs run School / Class X / Unit Test 2, and the standard and assessment selects are greyed because navigation settles them — each says so on hover. The Early Intelligence strip is styled as calm information, not an alert — it is a trust indicator, and it disappears on its own once a second assessment is analysed. Below it, the five tabs and the sticky filter bar that serve every filter combination through one interface.

points below X-A on the same tested competency.

●●● High confidence

A section gap describes tested performance on this assessment only. It is not a measure of teaching quality, and BoardX does not attribute it to any teacher.

RECOMMENDED INTERVENTION PLAN

11 What should my school act on now?

Priority combines student impact, marks exposure, Board recurrence and confidence. A confirmed problem without a localized cause is routed to investigation, not to an intervention.

PRIORITY

1

Mathematics · Quadratic Equations — Application Problems Very high ●●● High

Large number of students affected + meaningful marks exposure + strong Board recurrence + high-confidence evidence.

Application-focused revision Board-style question practice

Open finding >

PRIORITY

2

Physics · Electricity — Numericals High ●●● High

High student impact and strong, consistent Board recurrence.

Numerical-practice drill sets Worked-example walkthroughs

Open finding >

Investigate

Physics · Light High ●●● High

Problem confirmed, cause not localized — recommend manual answer-script review before prescribing an intervention.

Open finding >

Section comparison and intervention plan \$5.3 (10-11)

Section comparison carries its explicit non-attribution note: a section gap is never implied to equal teaching quality. In the plan below, the confirmed-but-unexplained Light finding is ranked as "Investigate", not given an intervention it hasn't earned.

12

What can't we recommend yet, and why?

Cause not localized

Problem confirmed. Cause not localized. Manual review recommended.

Paper under-tests this area

This assessment included too few application questions to confidently assess application readiness.

Early signal

A possible pattern is visible, but there is not yet enough evidence for a strong conclusion.

Trend not yet available

Trend and consistency insights require at least one additional analysed assessment.

All four limited-evidence states \$5.7

Gathered on one screen so they can be reviewed together: trend not available, early signal, cause not localized, and paper under-tests a competency. None is styled as an error, and Cause Not Localized reads investigative rather than alarming — a confirmed problem with no known cause is a different kind of finding.

Issued

Share with student

Early signal

Issue and share are demo-only in this build: state resets on reload and nothing reaches the student account.

Student report, teacher-facing

\$6.4

Lighter than the principal's view and led by its actions. Issue freezes the diagnosis and disables itself; Share only becomes available afterwards.

PIN for Aditi R.

Hand this to the student or parent. It is shown once and cannot be retrieved again.

4 8 2 7

Copy

With roll no. 01 and the school code, this signs Aditi in to the Science report only.

Done

One-time PIN

\$6.4 → \$7.1

Shown once and not retrievable, the same pattern as staff key issuance. The PIN is generated at the moment of sharing, not at enrolment — so a school can share Term 1 and hold Term 2 back until a parent meeting without inventing a separate mechanism.

05 · three screens

Student

The most sensitive surface in the product, and deliberately narrower than what any teacher sees: no classmates, no percentile, no Board urgency ranking. Plain language, warm tone, and a mascot that is not allowed to force optimism.

My Reports \$7.2

A flat list, most recent first — no filters, no search, because a student has a handful of these at most. The empty state is the mascot's Hello pose and one calm line: nothing shared with you yet.

Shared by your teacher. Ask them if you want to go through any of this together.

Report — improving \$7.3

The Exam Feedback card from the brand sheet: the score in a rounded card, a small trend arrow, one encouraging line, and the mascot in its Improve pose because this attempt is stronger than the last on file. No share, compare or class-average affordance anywhere.

Report — flat **\$7.3**

The same screen on a flat result. The pose drops to neutral and the arrow goes sideways, so the mascot never celebrates a result that doesn't warrant it. Achieve is reserved for a genuine standout.

What's real and what isn't

- **No backend.** Every figure renders from `src/lib/avail-mock-data.ts`. Nothing in the codebase calls a network endpoint — the numbers are consistent because the fixture is, not because anything computed them.
- **The  items stay mocked.** Cause Not Localized, the Potential Ladder, the intervention priority score and the anomaly pattern labels are Dependency Index #3–#6. They are drawn here in the shapes the spec describes and marked as backend work in the source, not wired.
- **The mascot is still an SVG stand-in** drawn from the brand sheet — cream body, navy-to-teal-to-gold wing, orange tail. It lives in one file and carries the sheet's pose vocabulary, so swapping in the real artwork changes nothing else.
- **Class XII is deliberately empty.** The pilot assumptions give one analysed assessment, for Class X, so Class XII shows the state it is actually in rather than a second invented cohort. Populating it is a mock-data job, not a UI one.
- **Four open decisions** from §10 are untouched by this build: PIN delivery, whether a class teacher may edit another teacher's marks, where the RIASEC test lives, and whether a class teacher gets a scoped-down BoardX.
